

Adventist University of West Africa,
Monrovia, Liberia

College of Nursing

Dean of the College

Erhuvwukorotu Kollie,
MS, RN, RM

The school is currently on its temporary site: Sharing the Adventist High School campus

- We started March 7, 2011, and have run just two semesters. Currently we are in the second semester which will end in December 2011.
- Total number of students that have enrolled for the College of Nursing are 88 students.

Faculty

- **The College of Nursing** operates a **four-year BS Program** which highlights electives in Maternal and Child health Nursing, Pediatrics Nursing, and Community Health Nursing in the final year.

- We plan to move to our permanent site by the middle of next year 2012.
- We are challenged with the need for an adequate, well equipped nursing laboratory, a 36 seated coaster bus to convey students to the clinical site as the permanent site is situated on the outskirts of Monrovia city, manikins, and simulators for clinical demonstration.
- We also need books, and audiovisual equipments like a projector, and computers etc.

Something special to know!

- Liberia is recovering from war which lasted about 15 years, and so every sector in the country including health and education have suffered setbacks.
- Now the country's education and health ministers who are familiar with the quality of Adventist education worldwide are hoping for a reformation and we have been given the opportunity to prove ourselves once more.
- We are poised to produce graduates with Christian virtue to provide quality care to the people of Liberia.
